Limes

**Nutrition Info**

One medium lime has 20 calories and provide vitamin C.

**Fun Facts**

Limes actually increase in weight after they are picked and begin to ripen!

Limes helped prevent scurvy, the once-dreaded disease found among sailors and soldiers caused by a deficiency of vitamin C, since they didn’t have fresh fruits and vegetables on long voyages.

The peel of the lime is called “zest” and it is used in many dishes and beverages. Simply scrape the outer, colorful skin of citrus fruits.

**Uses**

Marinate chicken or beef in lime juice & lime zest.

Try fish seasoned with a squeeze of fresh lime juice – you can even bake the fish with lime slices over the top.

Squeeze a lime into your salsa for a citrus twist.

---

**Pick:**

- Choose firm limes that are glossy with smooth skin.
- For sweeter flavor choose darker green limes.

**Store:**

- Limes can be stored at room temperature for 1 week or in a plastic bag in the refrigerator for up to 2 weeks.
- Cut limes should be refrigerated and used within a few days.

**Prepare:**

- Before use, bring limes to room temperature as this will yield more juice.
- Roll the limes on a firm surface before juicing, cut in half and then juice.
