Nutrition Info

One medium potato has 150 calories and provides vitamin C, potassium and fiber.

Fun Facts

Of the more than 5,000 varieties of potatoes in the world, the most common is the red potato.

The Irish called the potato a “spud” after the spade that was used to dig them, called a “spudder”!

Many people believe potatoes to be the root of the plant, but they are actually a tuber – an underground stem.

Uses

The entire potato is edible! Wash well, but keep the skin on for added fiber.

Instead of using butter, sour cream and cheese, try spicing up potatoes with olive oil and seasonings such as black pepper, rosemary, garlic, or basil.

Family Friendly Activities

Allow your children to help mash cooked potatoes using a potato masher or heavy fork.

Farm2School Updates

This year the school District of Holmen will be making a new homemade cheesy meat loaf recipe that will be featured in all of the Holmen schools. The meatloaf will be made with locally grown, grass fed ground beef. Besides tasting great, this meatloaf will be high in omega 3’s, low in sodium, and made by their very own staff.

Pick:

• Choose firm, smooth-skinned potatoes, free of wrinkles and sprouts.
• Discard potatoes with soft or rotten spots as the flavor will be affected.

Store:

• Depending on variety, potatoes can be stored for up to a couple months in a cool, ventilated area. Do not store whole potatoes in the fridge.

Prepare:

• Wash and scrub the potatoes before use.
• If the potato has sprouted or has a green tinge but is still firm, you can still eat it! Simply remove sprout or green skin before cooking.
• For quick cooking, simply pierce a washed potato with a fork & place in the microwave for 3-5 minutes or bake at 375 degrees for 15-30 minutes, or until soft.
